Software engineer having 2 years 8 months of experience working in Bangalore for a fintech-based startup as a front-end developer with expertise in developing scalable single-page applications, and cross-browser compatible applications using **React**, **Redux**, **JavaScript**, **HTML**, **CSS**, and **Tailwind CSS**.

### Skills

### Professional Experience

#### Vaibhav Vyapaar Private Limited,

Feb 2021 – present | Bangalore, India

Software Engineer (React JS Developer) 

- Used **React** and **Redux** to convert the existing Android app into a fully functional webview.
- Developed forms and new feature changes in the existing app during the product development cycle along with integrating them with the Android App.
- Worked with the customer team and compliance team to keep rolling new changes to the product based on new Government and RBI guidelines.
- Improved loading time and data sharing issues on the Product by using Microfrontend Technology
- Worked with the user experience team to improve the Product UI/UX

### Projects

#### LoanFront App

Feb 2021 – present

- With our app, LoanFront, you can apply for loans quickly and easily. The entire loan application procedure is handled online, from providing your information and sending your supporting papers for verification and disbursal.
- skills used REST APIs · HTML5 · Cascading Style Sheets (CSS) · Bootstrap · React.js · JavaScript · Redux.js

## LoanFront Admin Dashboard

Feb 2021 – present

- The admin dashboard is an application that our internal team is used to verify customer documents it is used to verify the user details when a user goes to manual verification and it is used to solve the customer problems when the user faces any payment problems.
- REST APIs · HTML5 · Cascading Style Sheets (CSS) · Bootstrap · React.js · JavaScript

## Certificates

---

### Web Development

I've successfully completed a three-month web development course at the Infocampus Institute in Marathahalli, Bangalore.

### Namaste React Live Course

Completed NamasteReact live course offered by Namaste.dev (mentored by Akshay Saini) where I gained skills to develop dynamic user interfaces and deep-dived into React-specific concepts like JSX, components, state, props, hooks, and more. As part of the course, I developed a functional food ordering and a video stream app.
